*Faculty Publications*

2003 - 2004

## Foreword

With this publication, I am pleased to recognize the outstanding scholarly contributions of the faculty in the College of Health and Human Services. An inherent dedication to the research mission of the college is represented in this compilation of faculty publications from calendar years 2003 and 2004. This marks the first time that our college has gathered and published such a listing, and I believe it reflects well on the faculty's commitment to scholarship.

Of course, the faculty of CHHS are not new to the research mission. However, further advancing the scientific foundations of each of our disciplines has received renewed emphasis at all administrative levels at SDSU. And, as a college dedicated to applied disciplines, we know too well that no clinical advancements can be made without the rigors of scientific inquiry aimed toward the underlying knowledge base of each of our areas.

We undertook this exercise for a number of important reasons. First, the contributions of the college to our disciplines are solid ones and it seemed important that we all have the opportunity to share in each others' successes. Second, it also seemed important that we each have an idea as to the nature of the work in which our colleagues are engaged. Finally, creating an avenue for sharing these research developments with our friends both internal and external to the college seemed to underscore the importance of this compilation.

In this report, an attempt was made to include only those writings that were subjected to the rigors of the editorial review process; many presentations, technical reports, abstracts, letters, and other scholarly contributions were, by necessity, omitted. And, though this guide is not comprehensive, it does go quite a distance in representing the body of work to be found within the College of Health and Human Services. We're certainly on the right path; let's continue to strive for even more robust scholarly accomplishments over the next couple of years.

A handwritten signature in black ink, appearing to read 'Marilyn Newhoff', written in a cursive style.
